B240PX

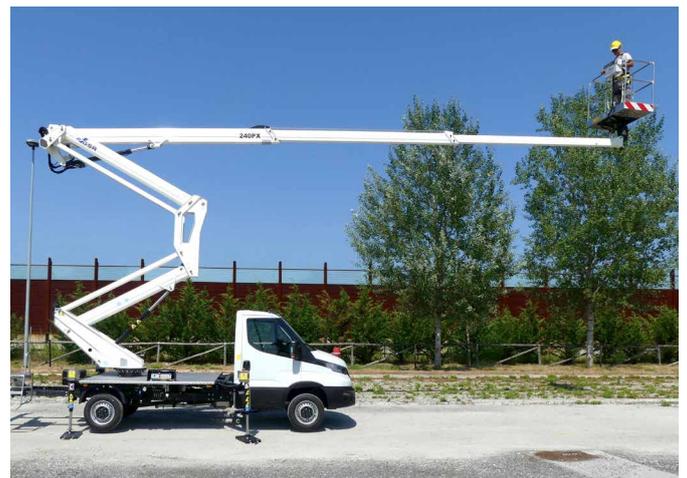

Comfort XEV 23,7 m

The GSR B240PX platform introduces a new feature in the concept of double "up-and-over" articulation.

While maintaining the traditional levels of rigidity and sturdiness of the PX series, the strength of this new model is the unrestricted rotation and 250kg of basket capacity.

Simple to use and technologically advanced, this machine, with vertical stabilizers in extendible version and horizontal outreach up to 12,3 metres, confirms the high-quality and innovation standards of GSR products.

GSR
AERIAL PLATFORMS

www.gsrspa.it

- Balanced and controlled swing of the articulation, making operations easier and safer Unrestricted
- rotation with 250 kg in the basket up to the maximum height
- "In shape" stabilization with vertical legs or extendible stabilization
- 12,3 metres of lateral outreach
- Intuitive and simple controls
- Advanced security systems, precise and immediate in use
- Light weight but robust structure
- Compact and balanced on the road like a normal car
- Easy and intuitive, ideal for self-drive hire
